NATIONAL ENERGY & TECHNOLOGY CORPORATION

TECHNOLOGY-DRIVEN SOLAR
SOLUTION FOR A SUSTAINABLE
TOMORROW

OFFICIAL@NETC.COM.PK

Company profile

NETC is an integrated green energy ecosystem provider specializing in Solar Home Solutions (SHS), Microgrids, Battery Energy Storage Systems (BESS), Advanced Metering Infrastructure (AMI), and surveillance and communication systems.

The company delivers comprehensive, end-to-end solutions for both domestic and international public and private sector entities. By combining clean energy technologies with intelligent monitoring and robust communication networks, NETC enables smarter, safer, and more efficient infrastructure

Solar Light NS-5

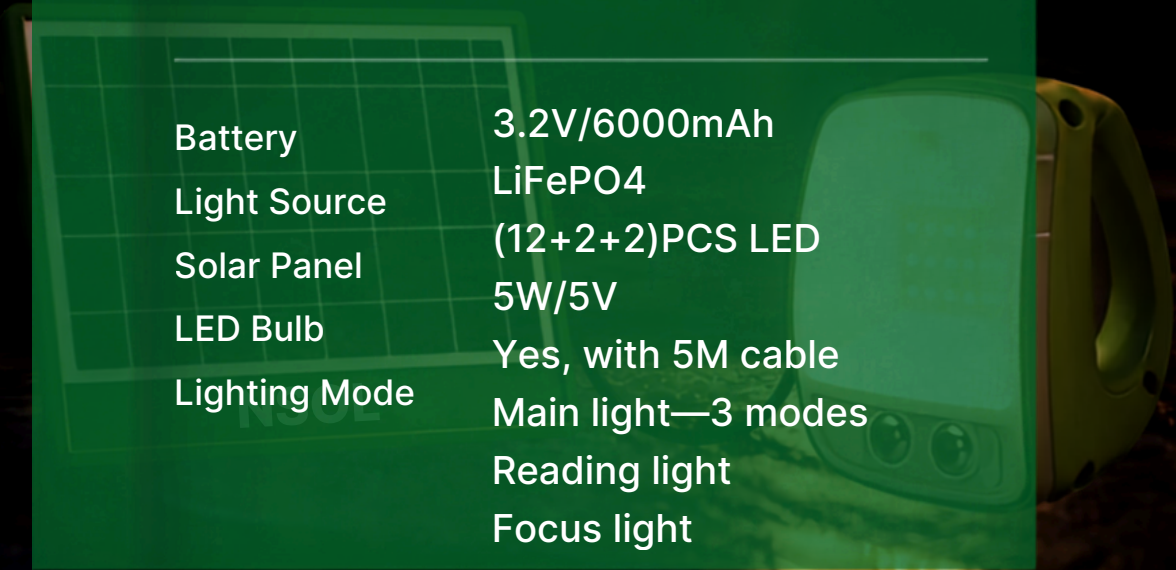

Solar powered

The NS-5 Solar Light is a compact, solar-powered lighting solution designed for reliable everyday illumination. It combines a high-brightness LED with a built-in LiFePO₄ battery and solar charging, while offering three brightness modes for flexible lighting

Technical Specifications

Battery	3.2V/500mAh LiFePO ₄
Light Source	0.5W super bright LED
Solar Panel	0.35W/4.5V
Lighting Mode	3 brightness modes

Battery	3.2V/6000mAh
Light Source	LiFePO4
Solar Panel	(12+2+2)PCS LED
LED Bulb	5W/5V
Lighting Mode	Yes, with 5M cable
	Main light—3 modes
	Reading light
	Focus light

Solar Lantern NS-7

Solar powered / Type-C input
Smart Indicator / Mobile charging

The NS-7 Solar Lantern is a more versatile solar-powered lighting system featuring Type-C input, smart indication, and mobile charging. It supports multiple lighting configurations, including a main light, reading light, and focus light, making it suitable for both general illumination and task-specific use.
